EDUCATION

University of Tirana <i>Bachelor Degree of Mathematics and Informatics Engineering</i>	Tirane, Albania <i>Sep 2017– Sep 2021</i>
--	---

WORK EXPERIENCE

CHECK24 Vergleichsportal GmbH <i>Java Developer</i>	Munich, Germany <i>Aug 2024 - Current</i>
---	---

Responsibilities & Experience

- Developed and maintained **microservices** using **Java** and **Spring Boot** in a large distributed system
- Designed and implemented **asynchronous, event-driven architectures** using **RabbitMQ**
- Worked on inter-service communication using both **synchronous (REST)** and **asynchronous messaging**
- Built end-to-end features **from scratch**, from idea and design to implementation and delivery
- Collaborated closely with **multiple internal teams** (backend, frontend, QA, product, DevOps)
- Coordinated and communicated with **external providers** for service integration and alignment
- Actively participated in **real Agile/Scrum workflows**, including sprint planning, refinements, reviews, and retrospectives
- Helped break down features into **technical tasks**, prepared work items, and supported team members during implementation
- Organized and participated in **technical discussions and coordination meetings**
- Contributed to frontend development using **React**, with hands-on experience in **HTML and CSS**
- Maintained high code quality through reviews, testing, and clean code practices
- Used **Git** for version control and collaboration in a large team environment

Technologies & Tools

- **Languages:** Java (8,11,17,21,25), JavaScript / TypeScript, HTML, CSS
- **Backend:** Spring Boot, Spring MVC, Spring Security
- **Architecture:** Microservices, Event-driven / Asynchronous Architecture
- **Messaging:** RabbitMQ
- **Frontend:** React, HTML, CSS
- **APIs:** REST, OpenAPI
- **Databases:** SQL, MongoDB
- **Containerization:** Docker
- **Testing:** JUnit, Mockito, integration testing
- **Version Control:** Git (GitLab / Bitbucket)
- **Ways of Working:** Agile / Scrum, cross-team collaboration

Responsibilities & Experience

- Designed and developed **microservices using Java and Spring Boot**
- Built several **microservices from scratch**, including architecture, implementation, and configuration
- Designed clean and maintainable **RESTful APIs**
- Documented APIs using **OpenAPI / Swagger**
- Integrated microservices with **relational and NoSQL databases**
- Implemented inter-service communication (REST, basic async messaging where applicable)
- Applied **Spring Security** concepts (authentication, authorization basics)
- Implemented validation, error handling, and logging standards
- Used **Docker** to containerize microservices for local and test environments
- Managed code using **Git** (feature branches, pull requests, reviews)
- Wrote **unit and integration tests** to ensure service reliability
- Participated in architectural discussions and technical decision-making
- Worked in an Agile/Scrum environment

Technologies & Tools

- **Languages:** Java (8,11,17)
- **Frameworks:** Spring Boot, Spring MVC, Spring Security
- **Architecture:** Microservices, REST
- **API Documentation:** OpenAPI / Swagger
- **Databases:** SQL (PostgreSQL / MySQL), MongoDB
- **Containerization:** Docker
- **Build Tools:** Maven
- **Testing:** JUnit, Mockito, Testcontainers
- **Version Control:** Git (GitLab / Bitbucket / GitHub)
- **Other:** JSON, HTTP, basic cloud concepts, Linux

Adamant Solutions

Java Developer

Tirane,Albania

July 2022 – June 2023

Responsibilities & Experience

- Developed and maintained backend functionality using **Java** and **Spring Boot**
- Worked on a **monolithic architecture**, understanding layered design (controller, service, repository)
- Integrated and managed data using **relational and NoSQL databases** (e.g. OracleDB, MongoDB...)
- Implemented RESTful APIs and handled request/response flows
- Assisted in debugging, fixing bugs, and improving existing code
- Used **Git** for version control (branching, commits, pull requests, code reviews)
- Gained experience with **Docker** for local development and containerized environments
- Learned to write basic unit and integration tests
- Followed clean code principles and coding standards

Technologies & Tools

- **Languages:** Java (8,11,17) , TypeScript (basic)
- **Frameworks:** Spring Boot/Spring MVC , Angular (basic understanding)
- **Databases:** SQL (e.g. PostgreSQL / MySQL), NoSQL (e.g. MongoDB)
- **Version Control:** Git (GitHub / Bitbucket / GitLab)
- **Containerization:** Docker
- **APIs:** REST
- **Build Tools:** Maven
- **Testing:** JUnit, Mockito (basic usage)
- **Other:** JSON, HTTP, Linux basics

SKILLS

Languages: C1 proficiency in English and Albanian; A2 proficiency in German

Skills: Java , Spring Boot ,Spring MVC, Spring Security, RESTful API development, OpenAPI / Swagger, Microservice architecture, Monolithic architecture, Event-driven & asynchronous systems, RabbitMQ, React, Angular, HTML, CSS, SQL databases (PostgreSQL, MySQL, OracleDB ...), NoSQL databases (MongoDB), Docker, Git, Maven, JUnit, Mockito, Integration testing, JSON, HTTP

Hobbies / Interests

- Football (playing and watching)
- Sports and fitness
- Snowboarding
